

Demand Response for Oil and Gas

Turn Your Energy into Additional Revenue While Supporting Grid Reliability

Oil & gas customers face ongoing profitability challenges due to the volatility of commodity and barrel prices, which can compress margins and disrupt your bottom line. Participating in demand response and energy flexibility programs can offset these pressures by generating new revenue streams and reducing energy costs during peak pricing periods.

CPower helps oil & gas operations and other customers monetize energy assets, reduce costs and support grid reliability, without disrupting production or compromising safety.

Whether upstream, midstream or downstream, CPower's 6.7 GW Virtual Power Plant platform ensures seamless participation of oil & gas customers in demand response and energy flexibility programs, earning you revenue while maintaining operational integrity and protocols.

Your Operational Flexibility is Valuable

- **The electric grid pays oil & gas customers** to periodically use less energy to balance electric supply and demand.
- **By leveraging their energy assets oil & gas operations, refineries and petrochemical plants can add new revenues streams**, save money on their collective energy spend while enhancing the resiliency and reliability of the power grid.
- **Oil & gas operations are well-suited to help the power grid** because they can curtail large amounts of electric load when demand exceeds supply or electricity prices are high.
- **CPower works with your engineers and site managers to unlock maximum revenue** from your energy assets and ensure that participation is non-disruptive to production.

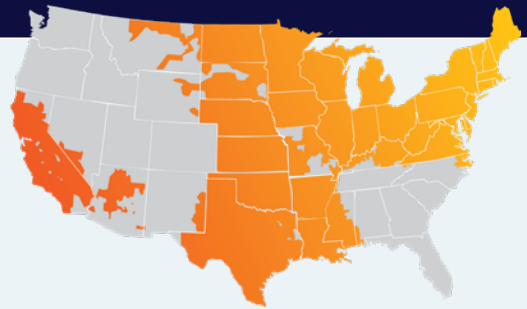

CPower's VPP Platform Unlocks Value, Faster

- **Turnkey enrollment, automated control systems and simple API integration with CPower's Virtual Power Plant platform** enable you to begin participating with ease. Our platform also helps you react in real-time to energy prices, power costs and savings opportunities that benefit your bottom line.

Leading Virtual Power Plant Platform

**6.7 GW at
~23,000 sites**

**\$1.2 BILLION+
in revenue paid to
customers since 2015**

- **CPower's proven platform is used by more than 2,100 customers across all major industries at nearly 23,000 sites nationwide**, delivering superior economics with minimal disruptions. It is also backed by our 24/7/365 in-house dispatch team.
- **Wood Mackenzie has recognized CPower as North America's largest VPP platform** for commercial and industrial flexible capacity under management for two consecutive years. For over a decade, we've turned energy flexibility into a financial advantage for partners and large energy users, paying over \$1.2 billion to customers since 2015.

Market Experience in Key Oil & Gas Regions Nationwide
